

Zeus Technical Specifications

Zeus is the next generation of live broadcasting with 16K 90 fps live encoding to multiple destinations including YouTube, Twitch, or a cloud provider of your choice. Zeus is a one-time purchase with a lifetime license for \$65,000.

Zeus is purpose-built for 2110 ProRes and is the world's most powerful live encoding server. If you have a unique cloud or DRM integration, SpatialGen will work with you to ensure the software shipped with your Zeus is fully compatible. Hardened in the fires of live sports immersive streaming, Zeus is the god of broadcasting.
